

Teaming and Collaboration Online

Great Teams Are Made of Great Team Members

Turn your teams into innovation incubators.

Work teams are the engines that power an enterprise. But most are stuck in neutral because they lack a shared purpose, have unclear goals and roles, and are slowed by ineffective leadership.

Teams that flounder cause organizations to miss opportunities and fall behind competitors. When all members work together, though, their teams become productivity powerhouses and innovation incubators.

Blanchard's Teaming and Collaboration Online teaches team members how to diagnose their team's stage of development and act in a way that contributes to its performance. With employees spending most of their time working in teams, understanding how to make them successful is essential for your business's future.

Outcomes

Improve interpersonal effectiveness

Increase employee engagement and connection

Increase team productivity

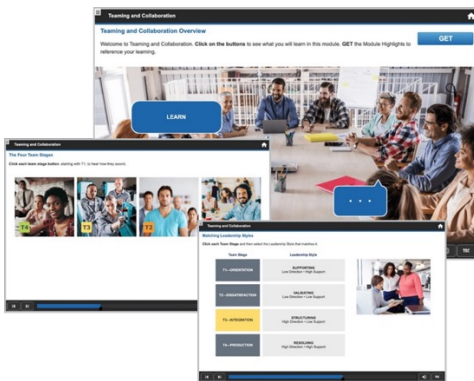

Avoid unproductive conflict

Learning Objectives

- Gain clarity on why the team is working together
- Build a foundation for accomplishing team goals
- Have an open dialog in which everyone can share ideas candidly while being curious about others' points of view
- Trust one another and trust in the power of the team
- Work collaboratively and support leadership best practices

LEARNER Experience

The Essence of Teaming and Collaboration Online

Teaming and Collaboration Online is a 35-minute module that explains how teams evolve from the orientation stage to the production stage. This enables learners to diagnose their team's stage of development and apply the corresponding actions to help the team achieve high performance.

Teaming and Collaboration Online includes microlearning activities, interactive learning, and tools for success.

Who Is Teaming and Collaboration Online Designed For?

- Intact team members or project team members
- Leaders who want to learn a mindset and model to build high-performance teams
- A geographically dispersed workforce
- Modern learners who prefer to do everything online

Learning Design

Micro-activities: One module, 35 minutes in length, that can be completed at the learner's convenience

Important Ideas: Coverage of the most essential concepts

Interactive Exercises: Fun and engaging activities, videos, games, stories, case studies, and online discussions

Tools for Success: A variety of activities and tools to help learners practice and apply their new skills
